Hello!!!

I am Leonardo, a passionate web developer driven by a desire to enhance user experiences through the creation of websites and applications. My journey in web development began in 2010 when I embarked on a mission to craft my own CMS using a blend of HTML, CSS, jQuery, and PHP.

Throughout my career, I have been fortunate to collaborate with exceptional companies such as Dice, Télé-Québec, Blizzard Entertainment, Wattsense, among others. and engage in projects that leverage cutting-edge technologies. My unwavering commitment to these endeavors has consistently contributed to achieving their overarching objectives.

Beyond crafting innovative web designs and templates, I have adeptly navigated projects featuring diverse layouts and designs created by fellow professionals. My approach is anchored in a strong sense of responsibility, an affinity for collaborative teamwork, and an unwavering commitment to fostering creativity. I firmly believe these traits are paramount in establishing a professional standard.

Professional Skills

- Blog, websites, landing pages and web applications development

- **Frontend:** HTML, Handlebars, CSS, JavaScript, TypeScript, JQuery, JSON, SEO

- **Markup:** Responsive Design, Mobile First, BEM Methodology

- **Backend and databases:** PHP, Node, Headless CMS, MySQL

- **CSS Preprocessor:** SASS

- **Javascript Frameworks:** Vue.js, React.js, Angular, Svelte

- **Server Side Rendering:** Nuxt.js, Next.js, Svelte Kit

- **Unit Test:** Jest + Enzyme, React Testing Library

- **CMS/Blogs:** BigCommerce, Wordpress, Drupal 7, Theme building from scratch

- **UX/UI Web Design:** Figma, Sketch, Zeplin, Invision

- **Version Control System:** Git, Github, Bitbucket, GitLab

Professional Experience

Encora / Franklin Energy / Dice

Senior Frontend Engineer

January 2022 - September 2022   /   June 2023 - Currently

BigCommerce, React.js, Angular, Stencil.js, JavaScript, TypeScript, jQuery, SASS, HTML, Handlebars, GraphQL, GA4, AWS, Testing Library, GIT

Franklin Energy (June 2023 - Currently)

- Ensure the codebase stays stable and readable, while building & improving code across the entire stack.
- Use React, TypeScript, HTML, Handlebars, SASS and JavaScript/jQuery while building super refined user interfaces.
- Working on other stores as needed using BigCommerce platform.
- Maintain and improve projects using HTML, Handlebars, JavaScript and SASS.
- Participating in code reviews made by others developers for accuracy prior to deployment.
- Implement mobile-first markup and responsive design for adaptable display across various screen sizes.

Dice (January 2022 - September 2022)

- Proficient in Angular framework, utilizing TypeScript and GraphQL to enhance the Dice.com app.
- Skillfully developing web components through Stencil.js, enhancing code modularity and reusability.
- Meticulously translating design concepts and wireframes into high-quality, visually precise code.
- Adhering to mobile-first principles to ensure seamless user experiences across devices.
- Experienced with SCRUM methodology and JIRA, effectively contributing to efficient project workflows.
- Utilizing Version Control System (Bitbucket) in all projects to maintain organized and collaborative development processes.

Maltem / Télé-Québec (Montreal, Canada)

Senior Web Engineer / Worked from Colombia

September 2022 - June 2023

React.js, Next.js, JavaScript, CSS Modules, SASS, HTML, Testing Library, GA4, GIT, Confluence, JIRA

- Develop dynamic web components using React.js, JSX, and CSS Modules.
- Create interactive widgets like photo gallery sliders and survey sliders.
- Utilize Figma templates for accurate alignment of components with design specifications.
- Implement GA4 and SEO across websites, enabling comprehensive consumer behavior tracking and optimizing search visibility.
- Develop utility functions for project-wide use, integrating Testing Library for robust testing.
- Apply unit tests to components and utility functions to ensure reliability.
- Assisted the team with front-end and templating tasks despite limited experience with .Net.
- Actively participate in meetings to plan projects, conduct dailies, retrospectives, sprint reviews, and demos.
- Implement mobile-first markup and responsive design for adaptable display across various screen sizes.

Ideaware / Blizzard / Ask Method

Software Frontend Engineer

2019 October - December 2021

React.js, Next.js, JavaScript, Styled-Components, Flow.js, Jest, HTML, SASS, JQuery, PHP, GIT

Blizzard

- Contribute in ReactJS development for Blizzcon and Call of Duty League websites.
- Crafted innovative user-facing features utilizing React.js.
- Designed reusable front-end components with precision using Styled-Components.
- Translated intricate designs and wireframes into pixel-perfect and high-quality code.
- Adhered to mobile-first principles for seamless cross-device experiences.
- Employed Flow.js for robust data typing and maintained code quality.
- Conducted unit tests using Jest and Enzyme to ensure code reliability.
- Utilizing Version Control System (Bitbucket) in all projects to maintain organized and collaborative development processes.
- Proficiently applied SCRUM methodology and JIRA for streamlined project execution.

Ask Method

- Played a pivotal role as a web developer for the AskMethod project.
- Leveraged technologies including PHP, HTML5, SASS, JS, and JQuery to create dynamic websites.
- Ensured high-quality standards across all components of the websites.
- Proficiently applied SCRUM methodology and JIRA for streamlined project execution.
- Utilized Version Control System (Bitbucket) in all projects to ensure organized collaboration and code management.

Professional Experience

Axial (Sherbrooke, Québec)

E-Commerce Developer / Worked from Colombia
2019 January - October 2019
WordPress, Drupal, Vue.js, React.js, JavaScript, PHP, SASS, HTML, GIT, MySQL

- Proficiently develop fullstack websites using HTML5, CSS3, JavaScript, PHP, and MySQL for robust functionality.
- Expertly build custom themes from the ground up for Drupal and WordPress websites, ensuring unique and tailored designs.
- Skilled in web development using Vue.js and React.js to create dynamic and interactive user interfaces.
- Implement responsive design principles to guarantee optimal user experiences across various devices.
- Successfully integrate applications and websites to enhance functionality and user engagement.
- Dedicate to maintaining high quality standards across all websites and web applications.
- Employ Version Control System (Gitlab) in every project for effective collaboration and code management.
- Provide valuable support to fellow team members, contributing to the success of their projects.

Wattsense (Lyon, France)

Web Designer and Developer / Worked from Colombia
January 2019 - March 2019
Vue.js, JavaScript, Bulma, SASS, HTML, GIT, Figma

- Ideate and design the primary website and establish style guidelines for new pages and forms.
- Seamlessly integrate design templates onto the website using Vue.js.
- Skillfully style components utilizing the Bulma CSS framework.
- Implement mobile-first markup and responsive design for adaptable display across various screen sizes.
- Effectively manage version control using Git and Github.

Ideaware

Web Developer
February 2016 - December 2019
Angular, JavaScript, WordPress, CSS, SASS, HTML, PHP, GIT, Sketch, Zepplin

- Accomplished in fullstack website development using HTML5, CSS3, JavaScript, PHP, and MySQL, including expertise in WordPress and Ghost CMS.
- Skilled in web development with Vue.js and React.js, creating dynamic user interfaces.
- Development in Angular.js and Ionic frameworks for mobile apps.
- Employ responsive design principles to ensure optimal user experiences across devices.
- Seamlessly integrate applications and websites to enhance functionality.
- Maintain high-quality standards across websites and applications.
- Utilize Version Control Systems (Git, GitHub, Bitbucket) for effective collaboration and code management.
- Provide valuable assistance to teammates on their projects.

Sonovista Publicidad

Web Developer
September 2015 - January 2016
WordPress, PHP, JavaScript, JQuery, CSS, HTML, MySQL

- Proficiently create websites using HTML5, CSS3, JavaScript, PHP, MySQL, and WordPress.
- Implement responsive design principles across websites and applications for optimal user experiences.
- Utilize Git, GitHub, and Bitbucket for effective version control and collaborative development.
- Develop webmail interfaces using HTML and CSS.
- Successfully gather and comprehend customers' technical requirements for each project.

Professional Experience

Zona Cero
Web Developer and Support Engineer

March - September 2015

Drupal, PHP, JavaScript, JQuery, CSS, HTML, MySQL

- Led the successful development of the new website version, overseeing the entire process.
- Effectively coordinated and managed the work of the team..
- Proficiently developed websites using HTML5, CSS3, JavaScript, PHP, MySQL, and Drupal 7.
- Created and developed diverse sections and content types to enrich the website's offerings.
- Skillfully developed main themes from scratch, ensuring a unique and tailored design.
- Seamlessly migrated content from Joomla to Drupal 7.
- Utilized Git and Bitbucket for effective version control and streamlined collaboration.
- Conducted training sessions for journalists and Webmasters, enhancing their content management skills.

El Heraldo
Web Developer

December 2011 - October 2014

Drupal, PHP, JavaScript, JQuery, CSS, HTML, MySQL

- Skillfully gather and analyze technical requirements for each project.
- Define clear development phases for new feature delivery.
- Proficiently develop websites using HTML5, Javascript, jQuery, Ajax, Responsive Design, PHP, MySQL, and Drupal.
- Successfully combine UX/UI design principles to create engaging and user-friendly web experiences.
- Ensure high-quality standards across all developed websites.
- Provide training sessions for journalists, enhancing their content administration skills.

*AMWAY Award 2014

The project '**A La Caza del Pez León**' (Lionfish Hunting) was nominated in two digital journalism competitions in Colombia.

This project won a national honorable mention **AMWAY 2014** as one of the five most important projects of this event.

http://especiales.elheraldo.co/pez_leon

Serviparamo S.A.
Assistant Technologic Developer

2008 - 2011

- Technical assistance department for computers and laptops.
- Wireless installation and networking.
- Installation and configuration of Windows and Linux operating systems.
- Configuration of e-mail accounts and printers for users.
- Preventive and corrective maintenance of the company's computers and laptops.
- Development of one application on VB. Net for inventory management.
- Windows XP, Ultimate, Server; Linux (Ubuntu), Mac OS X, Microsoft Office, VB. Net, SQL Server, Backups.
